## visual rules® for Linux- Release of Version 3.2.1 of the Business Rules System

**(Immenstaad, Germany) February 1, 2006** – The German software vendor Innovations Softwaretechnologie today announces the new version 3.2.1 of its business rules system visual rules®. The highlight is the support of Linux as platform for modelling business logic with visual rules®.

Further new features extend the generation of test data. The new version is now available for downloading and a free test:

With **version 3.3**, Innovations announces a major release to be out in April:

- Extended statistics: There will be easy backtracking of the executed business rules step-by-step within the graphical model.
- A generator for **Web Services** will then enable to use business rules within **SOA** (Service-Oriented Architectures). visual rules® will generate the Web Services including **WSDL** and the deployment descriptors.

### International Customers

Today visual rules® is used by many customers worldwide. A selection of these is the U.S. company Wyndham offering luxury hotel & resort accommodations; the German HypoVereinsbank; the producer of agricultural machinery Claas; the IT company of the United Arab Emirates Zafin Labs and the Australian software specialist MobileSelect. The range of applications includes an early warning system for trading of credit default swaps, the calculation of transaction billing and the individual selection of cell phone rates.

### Media Inquiries:

If you would like to use images or pictures for your reporting, we will be happy to supply you with qualified material.
